

Modern Slavery Act 2015 Compliance

18 March 2026

Modern Slavery Compliance – Requirement

To meet our ethical and legal obligations under the Modern Slavery Act 2015, we audit our supply chain compliance and statements. This, as previous years is via a systematic assessment of our partners to verify that those meeting the statutory turnover threshold are compliant with mandatory reporting, while also identifying those who adopt these standards voluntarily. This process is essential for mitigating operational risk and maintaining the integrity of our procurement practices.

Modern Slavery Compliance – Result

We have conducted a comprehensive modern slavery audit of our suppliers and are satisfied that our supply chain is compliant. A small number of supplier statements remain outstanding; however, we are confident that these will be finalised and in place by the end of the financial year. Based on the legislation criteria, all relevant policies and audit results are formally recorded and maintained within our Supplier Due Diligence Database.
